

# INTREAD TYRE SENSOR

TYRE MONITORING INNOVATED BY RÖSLER

# INTREAD TYRE SENSOR

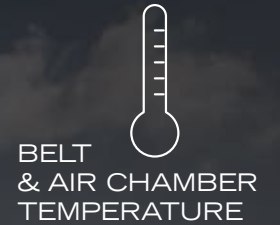

## A SMALL WONDER INTEGRATED IN YOUR TYRES

We challenged ourselves for more than 3 years to engineer the best and most powerful TPMS system the world has ever seen. The result is something entirely new. Something radically different from anything before. Our Masterpiece fulfills the highest standards in respect to precision, durability and productivity. This comprehensive high value innovation and breathtaking performance which the INTREAD contains is protected by several patents.

# INTREAD TYRE SENSOR

UNLIKE ANY OTHER TPMS SYSTEM WHICH HAS EVER BEEN BUILT  
The Intread sensor packs an unprecedented amount of technology, in an unthinkable small amount of space. It is the very first OTR TPMS system which is not only capable to measure the temperature at the belt of the tyre, it also reads the remaining tread depth and the air pressure. No TPMS system has been built this way before. And yet it makes so much sense, it is now hard to imagine building one any other way.
